Foreign currency translation gain/(loss) represents exchange differences arising from translation of the financial statements of the PRC subsidiaries whose functional currency (Renminbi, “RMB”) is different from that of the Group’s presentation currency (Singapore Dollar, “SGD”, “\$”). The Group’s net investment in PRC is not hedged as currency positions in RMB are considered to be long-term in nature. Such translation gains/(losses) are of unrealised nature and do not impact current year profit/(loss) unless the underlying assets or liabilities of the PRC subsidiaries are disposed of.

In the fourth quarter ended 31 December 2019 (“4Q2019”), the Group recorded translation loss of \$0.2 million due to weakening of RMB against SGD.

1(a)(ii) The following items (with appropriate breakdowns and explanations), if significant, must either be included in the income statement or in the notes to the income statement for the current financial period reported on and the corresponding period of the immediately preceding financial year:

(a) Updates on the efforts taken to resolve each outstanding audit issue

(b) Confirmation from the Board that the impact of all outstanding audit issues on the financial statements have been adequately disclosed

The latest audited financial statements, for the financial year ended 31 December 2018, were subjected to a disclaimer opinion by the independent auditor of the Company (the "Auditor"). The following matters were included in the said audit opinion:

i) Assets and liability of disposal group and discontinued operation

Update:

As the Chinese Government has yet to finalise the compensation for the Mining Assets and negotiations are still ongoing, significant uncertainty continues to exist in the appropriateness of the discontinued operation in the statement of comprehensive income and the carrying values of the assets and liability of disposal group in the balance sheet as at 31 December 2019.

ii) Impairment of investment in subsidiaries and amounts due from subsidiaries

Update:

Significant uncertainties continue to exist with respect to the outcome of the settlement negotiations with the Chinese Government. The recoverable amounts of the investment in subsidiaries are dependent on the outcome of the settlement negotiations.

- iii) Recoverable amount of property, plant and equipment
Update:
Using independent valuation reports prepared in 2019 by an independent Chinese professional valuer engaged by one of the Group's bankers, the Group recorded additional impairment charge of \$2.18 million on the P₄ plant in FY2019.

The Board confirms that the impact of the abovementioned audit issues on the financial statements have been adequately disclosed.

4. Whether the same accounting policies and methods of computation as in the issuer's most recently audited annual financial statements have been applied.

Except as disclosed in Paragraph 5, the Group and the Company have applied the same accounting policies and methods of computation in the financial statements for the current reporting period as those of the most recently audited consolidated financial statements for the financial year ended 31 December 2018.

5. If there are any changes in the accounting policies and methods of computation, including any required by an accounting standard, what has changed, as well as the reasons for, and the effect of, the change.

SFRS(I) 16 Leases

SFRS(I) 16 *Leases* requires lessees to recognise most leases on balance sheets. SFRS(I) 16 requires recognition of a liability for lease payments (i.e. lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e. the right-of-use asset) at the commencement date of the lease. Lessees are required to separately recognise the interest expense on the lease liability and depreciation expense on the right-of-use asset during the lease term. The Group also applied the exemption not to recognise right-of-use asset and lease liability for lease for which the lease term ends within 12 months as of 1 January 2019.

Prior to adoption of SFRS(I) 16, the Group recognises lease payments as rental expenses for its leases previously classified as operating leases.

On the required effective date of SFRS(I)16, the Group and the Company adopted SFRS(I) 16 retrospectively with the cumulative effect of initially applying the standard as an adjustment to the opening retained earnings at the date of initial application (1 January 2019). Accordingly, the Group recognised right-of-use asset and lease liability of \$0.2 million and \$0.2 million, respectively, on its balance sheet, and cumulative adjustment of \$10,000 in retained earnings as at 1 January 2019 upon the adoption of SFRS(I) 16.

The Group also presented land use rights as right-of-use assets as of 1 January 2019.

6. Earnings per ordinary share of the group for the current financial period reported on and the corresponding period of the immediately preceding financial year, after deducting any provision for preference dividends:

(b) on a fully diluted basis (detailing any adjustments made to the earnings).

8. A review of the performance of the group, to the extent necessary for a reasonable understanding of the group's business. It must include a discussion of the following:

- (a) any significant factors that affected the turnover, costs, and earnings of the group for the current financial period reported on, including (where applicable) seasonal or cyclical factors; and (b) any material factors that affected the cash flow, working capital, assets or liabilities of the group during the current financial period reported on.

The figures in this section where applicable, have been rounded to the nearest two (2) decimal place.

The Group is organised into product units as follows:

- (a) upstream segment relates to the business of exploration, mining and sale of phosphate rocks (the “**Upstream Segment**”). As discussions are in progress with the Chinese Government, the Upstream Segment had been presented as discontinued operation; and
- (b) downstream segment relates to the business of manufacturing, sale and trading of phosphate-based chemicals products such as elemental phosphorus (“**P₄**”), sodium tripolyphosphate (“**STPP**”) and sodium hexametaphosphate (“**SHMP**”); the sale of P₄ by-products, such as slag, sludge and ferrophosphate; and other phosphate chemicals (the “**Downstream Segment**”).

Profit or loss

Revenue, cost of goods sold and gross profit

Revenue from continuing operations increased by \$0.14 million, from \$0.27 million in 4Q2018 to \$0.41 million in 4Q2019, due to contribution from sale of sodium trimetaphosphate (“STMP”) to India and the Middle East. The Group sold 177 tonnes of STMP in 4Q2019. There were no STMP sold in 4Q2018. The increase was partially offset by reduction in contribution from STPP and P₄ in 4Q2019. Sales of STPP were affected by US tariffs. The Group sold 76 tonnes of STPP in 4Q2019 as compared to 281 tonnes in 4Q2018. In 4Q2018, the Group sold 5 tonnes of P₄. There were no P₄ sold in 4Q2019 as the Group depleted its P₄ inventory.

Cost of goods sold for continuing operations increased by \$0.19 million, from \$0.14 million in 4Q2018 to \$0.33 million in 4Q2019.

Gross profit from continuing operations decreased from \$0.13 million in 4Q2018 to \$0.08 million in 4Q2019, mainly due to different mix of products sold in the two periods.

Other income

Other income increased by \$0.15 million, from loss of \$0.07 million in 4Q2018 to profit of \$0.08 million in 4Q2019 mainly due to increase in interest income in 4Q2019 and gains on sale of excess raw materials in 4Q2019, as compared to net loss from sale of excess raw materials of \$0.07 million in 4Q2018. In addition, other income in 4Q2019 includes the contribution from rental of the STPP plant. There were no such income in 4Q2018.

Selling and distribution costs

Selling and distribution costs decreased by \$0.04 million, from \$0.08 million in 4Q2018 to \$0.04 million in 4Q2019 due to lower transportation related costs in 4Q2019 as a result of the absence of P₄ sales and reduction in expenses due to smaller operation size.

General and administrative costs

General and administrative costs decreased by \$0.49 million, from \$1.13 million in 4Q2018 to \$0.64 million in 4Q2019, mainly due to reduction in general operation expenses, including salaries and staff related costs, professional fees and other administrative expenses as the Group downsized its operations.

The reductions were partially offset by increase in adjustments made in 4Q2019 for allowance for stocks obsolescence and stock take losses.

Finance costs

Finance costs remained at \$0.12 million in 4Q2019 and 4Q2018.

Other expense

Other expense decreased by \$4.66 million, from \$6.23 million in 4Q2018 to \$1.57 million in 4Q2019, mainly due to reduction in allowance for impairment made for property, plant and equipment. Allowance for impairment made for P₄ plant was \$2.18 million in 4Q2019, as compared to allowance of \$3.78 million made in 4Q2018 as a result of lower allowance made for P₄ plant and equipment. The value of plant and equipment related to P₄ was written down based on values estimated by independent valuers engaged by Bohai Bank.

In addition, there was a write back of allowance for impairment for STPP plant and equipment of \$0.61 million, as compared to allowance of \$2.44 million made in 4Q2018. The write back of allowance for impairment was computed on based estimated recoverable amount from rental of the STPP plant.

Tax expense

Tax expense of \$0.07 million in 4Q2019 mainly arose due to recognition of deferred tax liability arising from unremitted foreign-sourced income.

Discontinued operation

Profit from discontinued operation increased by \$0.38 million, from loss of \$0.15 million in 4Q2018 to profit of \$0.23 million in 4Q2019, mainly due to write back of allowance for doubtful debts in 4Q2019 as the Group received partial repayment (RMB2.0 million) from an outstanding receivable which had been fully provided for previously. The write back was partially offset by allowance for doubtful debts made in 4Q2019 for certain prepayments and receivables pertaining to mining operators.

The above increase was partially offset by absence of contributions from rocks sales in 4Q2019. The Group sold 1,900 tonnes of powder phosphate rocks in 4Q2018.

Balance sheet

Non-current assets

Non-current assets decreased by \$2.67 million, from \$20.88 million as at 31 December 2018 to \$18.21 million as at 31 December 2019, mainly due to depreciation and disposal of property plant and equipment, and allowance for impairment made on P₄ plant. The value of plant and equipment related to P₄ was written down based on values estimated by independent valuers engaged by Bohai Bank. The decrease was partially offset by a write back of allowance for impairment for STPP plant and equipment. The write back of allowance for impairment was computed on based estimated recoverable amount from rental of the STPP plant.

During the year, the Group received the land use right to the Hanwang Land. Accordingly, the cost of the land use right was reclassified from prepayments to right-of-use asset.

Current assets

Current assets decreased by \$2.95 million, from \$93.54 million as at 31 December 2018 to \$90.59 million as at 31 December 2019 mainly due to decreases in stocks, trade and other receivables, prepayments, cash and bank balances and assets of disposal group. Reduction in cash and bank balances was due to payments made in FY2019.

Reduction in stocks mainly due to sales of inventories and adjustments made for allowance for stocks obsolescence and stock take losses. Reduction in other receivables and prepayments mainly due to lesser receivables and prepayments in 2019 as a result of smaller operation size and allowance for doubtful debts made for certain prepayments and receivables pertaining to mining operators.

In 3Q2019, the PRC government returned deposits in respect of the Group's rehabilitation obligations for its mines. These deposits were previously included in "assets of disposal group". The PRC government requires the amounts to be held in specific bank accounts and the use of these amounts is restricted until the completion of rehabilitation of the mines. Accordingly, as at 31 December 2019, the amounts were included in cash and bank balances on the balance sheet.

Current liabilities

Current liabilities decreased by \$0.17 million, from \$10.07 million as at 31 December 2018 to \$9.90 million as at 31 December 2019, mainly due to reduction in interest bearing bank loans and other payables due to payments made and liability of disposal group due to weakening of RMB against SGD.

The decreases were partially offset by recognition of the current portion of lease liability in accordance with SFRS(I) 16 and increase in advance payments received from customers.

Non-current liabilities

Non-current liabilities decreased by \$0.11 million, from \$19.28 million as at 31 December 2018 to \$19.17 million as at 31 December 2019 mainly due to decrease in deferred tax liabilities and

deferred income resulting from the weakening of RMB against SGD. The decrease in deferred tax liabilities was partially offset by recognition of tax liabilities arising from unremitted foreign sourced income.

Cash flow statement

Operating loss before working capital changes was \$0.35 million in 4Q2019. Cash inflow due to changes in working capital was \$0.80 million mainly due to decrease in receivables and stocks and increase in payables. Payments for interest expense in 4Q2019 amounted to \$0.12 million. The above contributed to net cash flows generated from operating activities of \$0.35 million in 4Q2019.

Cash flows used in financing activities of \$0.35 million in 4Q2019 were mainly due to partial repayment of bank loan, increase in pledged deposit used solely for payment of interest expense and payments of lease liability.

9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.

Not applicable.

10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

The Group's lawyers have sent a reminder to the Chinese Government but it has yet to receive any response to its proposal in relation to the appointment of independent expert, including his terms of reference to conduct an independent valuation of the Company's claims against the Chinese Government. In addition, the Group has asked the Singapore Government for assistance in raising this issue with the Chinese Government.

The Chinese Government has not given management any further proposal to settle the investment dispute but has informed the Group's lawyers that they will check with the Sichuan Government on the status of their internal discussion. However, due to the Covid 19 outbreak in China, they have not provided any update to the Group's lawyers.

No adjustments have been made to the carrying value of the assets and liabilities of the disposal group as the recoverable amount will be dependent on the finalisation of compensation when either negotiation or arbitration is concluded.

The Company will make an announcement as and when there are material developments on this matter.

Based on information available to the Group, the SOE customer, whom the Group entered into a settlement agreement with, will be resuming mining in first half of 2020. This development hopefully will result in the outstanding receivable due from the said customer be settled and phosphate rocks be available for the economic production of P₄.

In FY2019, the Group received RMB2.5 million out of the outstanding balance of RMB5.6 million. A further RMB2 million was received in the form of bill receivables in February 2020. The write back of allowance for the RMB2 million received in February 2020 will be recognised based on the maturity dates of the bill receivable or, when the bills are redeemed, whichever is earlier. The Group expects to recognise the write back by third quarter ending 30 September 2020.

As part of the settlement agreement with the SOE customer, the Group is entitled to charge interest at 6% per annum, from 23 March 2018 to the date of payment of last installment. The Group has not recognise any of the interest income in accordance with SFRS(I) 9, where the interest income on credit-impaired asset can only be recognised when the asset shows signs that it is no longer impaired. The SOE customer has asked for additional time to make payments on the remaining amount and Management is in discussions with the Group's lawyers for advice on how to respond to such a request. The interest income will be recognise when the SOE customer shows signs of being able to pay the remaining balance and the interest. Nonetheless, the Group remains committed to recover the entire remaining amount and the entitled interest.

Management is building up the downstream phosphate chemical business but the Covid 19 outbreak has made conditions challenging. With the conclusion of the phase 1 trade agreement between USA and China, the Management will work towards increasing the sales of phosphate chemicals to companies in USA. Management will follow the development closely and will provide updates as and when they arise.

Management is also exploring several opportunities for cooperation but they are in the preliminary stage and there is no certainty that any deal may materialise.

Barring unforeseen circumstances, the directors after taking into consideration the available cash resources, anticipated recoveries and fruition of the business plan which include *inter alia*, the possible sale of land, the availability of phosphate rocks for downstream processing, the sale of downstream phosphate chemicals, are of the view that the presentation of the financial statements on going concern assumption is appropriate.

15. **Segmented revenue and results for operating segments (of the group) in the form presented in the issuer's most recently audited annual financial statements, with comparative information for the immediately preceding year.**

For management purposes, the Group is organised into product units and has two reportable segments as follows:

- a. upstream segment relates to our business of exploration, mining and sale of phosphate rocks (the **"Upstream Segment"**). As discussions are in progress with the Chinese Government, the Upstream Segment had been presented as discontinued operation; and
- b. downstream segment relates to our business of manufacturing, sale and trading of phosphate-based chemicals products such as P₄, STPP and SHMP; and the sale of by-products, such as slag, sludge and ferrophosphate; and other phosphate chemicals (the **"Downstream Segment"**).

No operating segments have been aggregated to form the above reportable operating segments.

The Chief Operating Decision Maker monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on operating profit or loss which in certain respects, as explained in the table below, is measured differently from operating profit or loss in the financial statements. The Chief Operating Decision Maker does not monitor assets and liabilities by segments. The assets and liabilities are managed on a group basis. However, the information on additions to mine properties, land use rights and property, plant and equipment by operating segments is regularly provided to the Chief Operating Decision Maker.
